SUMMARY

Aspiring Front-End Developer with practical experience developing web applications through freelance projects. Strong passion for creating engaging user experiences and solving real-world problems through innovative solutions. A quick learner, highly motivated, and eager to contribute to a dynamic development team while continuously growing as a software professional.

EDUCATION

B.Tech in Computer Science, CGPA : 8.74 **Sep 2020 - May 2024**

GITA Autonomous College, Bhubaneswar

- Relevant Coursework in DSA, OOPs, Development, Software Engineering Principle and Database Management.

FREELANCE EXPERIENCE

Group Logistics (Front-End Developer) | *(React.js, Framer Motion, Firebase, Vercel, Git & GitHub)*

- Developed a sleek and responsive website using ReactJS, ensuring fast load times and smooth navigation across devices. Implemented modern UI elements with Tailwind CSS and Framer Motion for engaging user interactions and polished animations.
- Structured sections for services, contact, and about, showcasing brand identity and professionalism with a clean, minimalist design

Restaurant Promo Poster (Graphic Designer) | *(Canva)*

- Designed an eye-catching promotional poster for a local restaurant to attract walk-in customers. Focused on bold typography, vibrant color schemes, and clear messaging to match the brand's identity.
- Delivered multiple design variations based on client feedback.

PERSONAL PROJECTS

Expense Tracker | *(React.js, Framer Motion, JavaScript, Firebase, GitHub)*

- A web-based application for tracking expenses and managing transactions. It features real-time balance updates, user authentication, interactive dashboards with charts, and secure data handling using Firebase. Built with React.js, the app offers a clean and intuitive interface for efficient money management.

FreelanceFlow – Freelance CRM Tool | *(MERN Stack, AWS Q, MongoDB Atlas)*

- Developed a full-stack Freelancer CRM *(Client Relationship Management)* platform designed to help freelancers manage clients, invoices, payments, and project workflows. Built using the MERN stack with secure authentication, automated payment reminders, meeting notes, and project tracking. Integrated cloud database using MongoDB Atlas for scalable and real-time data access.

Data Analysis Dashboard | *(Python, Flask, NumPy, pandas, HTML, CSS, JavaScript, REST API)*

- Built a web application that allows users to upload CSV files and perform comprehensive statistical analysis, including mean, median, standard deviation, and correlation. Developed RESTful APIs to handle data processing and served interactive visualizations for effective data interpretation and insights.

TECHNICAL SKILLS

Programming Languages : *Python, Core Java, JavaScript, HTML, CSS*
Framework/Libraries : *React.js, Tailwind CSS, Bootstrap, Express.js, NumPy*
Design Tools : *Figma, Canva*
Query Languages/ Database : *SQL, MySQL, Firebase*
Other Tools : *Git & GitHub, VS Code*

EXTRACURRICULAR ACTIVITIES

Leadership & Club Activities

- Taught juniors the basics of web development as a core member of the Coding Club and guided them through coding challenges.
- Led the Music Club as the in-charge, overseeing events and mentoring members.
- Designed creative posters for the coding club to promote events and initiatives.
